802.11ac Wi-Fi Access Points

Our high-performance APs, incorporating the latest 802.11ac Wave 2 technology, are a perfect fit for customers of all sizes, including educational institutions, retail, hospitality, and healthcare providers. Completely plug-and-play, our APs are controlled and managed from the cloud and include a built-in stateful firewall and other measures for unmatched security at the edge.

Ethernet Switches

Our line of business-class Ethernet switches are ideal for Small- and Medium-sized Businesses (SMBs) or multi-site enterprise networks. The portfolio includes Gigabit Ethernet models as well as our ActivReach technology which triples the reach of standard Ethernet, delivering voice, data, and video across any grade of wiring.

Gigabit Routers

Our routers are market-proven and offer the industry's broadest selection of solutions for Wide Area Network connectivity, allowing you to connect customers with confidence. We offer modular as well as fixed-port access solutions to fit every customer's network routing needs enabling reliable, flexible connectivity in a cost-saving chassis.

Voice Gateways

Our market-leading voice gateways offer providers a cost-effective IP network strategy for VoIP deployment, with support for legacy equipment. MSPs can deliver SIP trunks, hosted PBX, and other integrated voice and data services to small and medium businesses, quickly and cost-effectively..

Session Border Controllers

SBC feature packs available with our routers and gateways provide SIP interoperability at customer premises creating a MSP migration path to various services, from business trunking to hosted VoIP.

Web and Spam Filtering

Our Web Filtering solution is a cloud-based solution that regulates the content employees can access, and protects the network from malware and malicious attacks, whille controling bandwidth usage.

Spam Filtering is a full-service, cloud based email security solution which filters an organization's email traffic without any expensive or time-consuming overheads.

Wi-Fi Analytics

Our Wi-Fi Analytics is ideal for retailers and others looking to monetize the network. As end users log onto the Wi-Fi network, capture their demographics, history, likes, etc., and translate that data into actionable advertisements and messages.
