Benefits

- Deliver Cost-Effective Converged Residential and Business Services
- Zero-touch Service Provisioning Eliminates Truck Rolls for Service Upgrades
- Manage an End-to-End PON Deployment with Productivity Tools for Monitoring, Troubleshooting, Provisioning, and Upgrading Networks
- Traffic Management Through Priority Queueing, Scheduling, Policing, and Traffic Shaping
- Uniquely Supports SFU, SBU, and MDU Deployments Streamlining Installation Procedures
- Key Part of Wireless Residential Gateway Deployment Strategy

Overview

The Adtran SDX 620 Series of XGS-PON Optical Network Terminals (ONTs) are designed to address the market with industry-leading voice, data, and video capabilities. Service providers will benefit from the high data rates of fiber optic transmission and the flexibility offered by Adtran's portfolio of Ethernet-based technology. In addition, these solutions support demanding residential and business gigabit services, cloud services, and remote work.

Expanding network capability requires next-generation 10G architectures. These architectures offer both the capacity and scale to economically support gigabit services and multi-gigabit demands well into the future. The SDX 620 Series provides a path to high-bandwidth applications. This enables service providers to support existing FTTH subscribers while delivering the price needed for mass-market residential and business applications.

Adtran offers a comprehensive portfolio of indoor and outdoor XGS-PON ONTs for single-family unit (SFU), small- to medium-sized business (SMB), and enterprise deployments. In addition, service providers are offered an array of options to address all subscriber utilization needs, from the growing smart home to the small business startup.

The SDX 620 Series of ONTs work in concert with Mosaic One, Adtran's intelligent Software as a Service (SaaS) management suite. Mosaic One helps to accelerate the expansion of gigabit broadband services through zero-touch service activation and unmatched network analytics and visibility. Experience the benefits of end-to-end network management with Mosaic One and deliver an exceptional subscriber experience.

SDX 620 SERIES

Portfolio Summary

SDX 622v 10GE with VoIP

	621	621i	622v	622vh
Access Technology	XGS-PON	XGS-PON	XGS-PON	XGS-PON
VoIP	-	-	2	2
1G UNI	-	1	1	1
