Dated 5th May,2022

Subject: Girijana Jeevana Ganga Project and Extension Project-
Final Progress Report - Regarding

Kind Attention: Mr. Nagesh Malyala, Manager (Administration)

Dear Sir,

This is the final report of Girijana Jeevana Ganga Project and Girijana Jeevana Ganga Extension Project. Also please find here with enclosed Utilization Certificate from the Auditor.

We have completed implementation of both Projects by March 31,2022. We drilled 36 bore wells, built platforms, fixed hand operated pump set and handed over to village committee. About 20,000 tribal population are getting safe drinking water. We drilled 36 bore wells (27+9= 36) of which one bore well is failure. All other 35 bore wells are functioning well and providing drinking water for about 20,000 tribal population.

A message surprisingly received on 4-5-2022, by our Honourable Chairman sir through Facebook Messenger is here with copied for your reference.

Please find here with list of the tribal villages where we drilled bore wells and provided drinking water. Also please find herewith the photographs of the bore wells provided to the tribal villages with ADTRAN Funds.

We do not have enough words to express our gratitude to ADTRAN Networks India Pvt Ltd for funding such a great project which will last more than next three decades which will provide water to the inaccessible tribal hamlets.

This is the most satisfying project for us since last one decade.

We are very grateful to you for sanctioning this project but also kindly providing extension of the project. In addition to this your continued guidance and monitoring helped us for better implementation.

I would have given this report in the 1st week of April,2022. After completion of the project when I was about to prepare a project our Honourable chairman sir instructed that myself and Mr.Venkat reddy should visit again all the 35 villages, see personally functioning of the borewell and obtain peoples feedback. And it took more than 6 weeks for us to visit the villages as per the direction of the Honourable Chairman sir. Hence this delay. All borewells are functioning and they are using. People are happy. In the month of April Honourable Chairman sir has visited 4 villages in the hot summer the interior villages of Gonduvada and Patha Gonduvada.

On 17th April,2022 Honourable Chairman sir visited Pathagonduvada Tribal Village.

Once again I express my gratitude on behalf of thousands of tribals for providing drinking water in the tribal villages with ADTRAN funds.

We look forward for your continued guidance and association.

Regards

P.Varun

Director CSR Projects.
