

FSP 150 Introductory

3 days *remote* or *classroom* technical training

The Fiber Service Platform (FSP) is a family of innovative products that provide comprehensive Optical + Ethernet networking solutions for access, metro core and regional networks. ADVA is focused on the needs of enterprise and service provider customers deploying data, storage, voice and video applications.

Objective

A training course which introduces the FSP 150 Platform. Students will learn how to create Ethernet services and how to manage the devices. They will get familiar with EtherJack™ Features. Performance monitoring, testing and troubleshooting topics are included.

- The training applies to all FSP 150 devices listed here:
 - GE206/101/102/104/112/114
 - GO: 102
 - XG: 108/210/116/118/120
 - XJ128
 - and Pro Variants (where applicable)
- Equipment typically shown:
 - FSP 150XG-210, FSP 150GE-114Pro, FSP 150-XG120 as they cover most common features

Knowledge of this class is the base for additional Advanced Ethernet Classes on dedicated features.

Note: we offer dedicated classes for FSP 150-XG 400 Family and for FSP 150-XG 300 Family.

Please, note: In case of a remote training session GoToTraining application or another remote training tool, e.g. Teams will be used. We will arrange a short test of the tool upfront the training – you will get invited for both – test and training session, if required.

For the practical exercises trainer will hand over keyboard and mouse to one student at a time for e.g. a configuration exercise. This will require the desktop version of GoToTraining Client installed on the student's computer/laptop.

Please note: recording of the remote training sessions is not permitted.

Benefits & Audience

- Benefits: To achieve self-sufficiency at installation, configuration, maintenance and troubleshooting of the FSP 150 product series
- Class size: 8 attendants maximum

FSP 150 Introductory

- Certificate of attendance, ACE exam available on request (separate order).

Prerequisites

The attendees should have basic knowledge about Ethernet, V-LAN Tagging and TCP/IP.

Agenda

Theory/Lecture

- System overview
- Hardware overview
- Management overview
- Ethernet Services
- Etherjack™ Features

Practice/Lab

- Installation (in a remote class, equipment will be physically connected)
- Setting up management
- Creating services
- Traffic Calculations
- Maintenance
 - Database Backup
 - Software upgrade
- Performance Monitoring
- Troubleshooting
