

AOE Administrator

2 days virtual or classroom technical training

Advanced Operational Environment (AOE) is a simplified end-to-end service delivery solution that enables streamlined workflow for high scalability, proactive network monitoring for SLA compliance, and solid decision support logic for operational efficiency. It transforms the traditional operating environment from equipment configuration and provisioning to a service-oriented approach and automates hardware tasks, eliminating customer service representative training and the need for equipment knowledge.

Objective

This course is for people who will be managing and administrating the ADTRAN AOE Network Management System. The course will cover basic Linux commands, AOE installation, AOE administration, user, and device management, as well as reporting and troubleshooting.

Benefits & Audience

- **Benefits**: To achieve self-sufficiency at installation, configuration, and maintenance of the AOE solution
- Class size: 6 students maximum
- **Target Audience**: Installers, System Engineers, Network Engineers, Network Operations Personnel, Product Technical Support Representative, System Administrator
- Certificate of Attendance

Prerequisites

AOE Overview - students can self-enroll at www.adtranuniversity.com

AOE Administrator

Agenda

Theory/Lecture

- Opening Firewall Ports
- Setting Runtime Properties
- AOE Licenses
- AOE Scripts Available
- AOE Installation
- User Management
- AOE Upgrades
- AOE Patch Installation
- AOE Migration
- General Linus Commands
- Software Management for Network Elements
- Support Community
- Web Ticket Creation

Practice/Lab

- Students will be using Amazon Workspaces (AWS) for all lab exercises.
- Installation of AOE
- Patch installation for AOE
- Upgrading AOE
- Migrating Databases for AOE
